

## CESSNA CITATION CJ3

### Aircraft Specifications

CJs have always been so intuitive to operate that even veteran aviators are often reminded of why they fell in love with flying in the first place. No matter what you fly now, get ready to fall in love all over again. Today's CJ3 began with everything that made the series a phenomenal favorite, then took the concept higher, farther and faster than ever before. And in a big way. Prepare yourself for a larger aircraft, more powerful engines, longer wings, a more spacious interior, added standard features, and the category's most advanced flight deck, ever. For increased interior comfort, the CJ3 cabin is more than 4 feet (1.22 m) longer than the original CitationJet's. That's nearly two feet beyond even the CJ2+'s. With all that room, even long-legged passengers can stretch out in the plush new seats with ease. The deepcushioned executive recliners slide fore and aft. And they track inboard toward the aisle to give passengers an extra helping of room, comfort and workspace.
